March 21, 2022

Strategic Planning Process To Begin!

The Parsippany-Troy Hills Township Board of Education is excited to embark on the continuation of our strategic planning process that will result in our next three-to-five year plan to enhance student achievement and further enrich our schools.

Strategic planning is a thoughtful, reflective process that depends on participation by all stakeholders. Your thoughts and suggestions are critical if this process is to be successful and provide the District with a meaningful three-to-five year plan to enhance our high performing district.

Students, teachers, administrators, parents, and community members will be invited to participate in the process by responding to our electronic surveys. The information gathered during this process will be used to identify areas that are effective and areas of focus over the next several years.

Please watch for announcements about survey participation. We welcome feedback from our schools and township as we define our focus for the coming years.
