What is a PWA -Progressive Web App?

A **PWA** is a mobile app that you download from a web browser on a mobile device. If you have ever seen an '**Add to Home Screen**' banner pop-up while browsing a website on your phone, and when you click the button, it installs itself on your home screen.

After the install, you can use the app icon on your iPhone or iPad and browse the same site you were accessing in your browser, but now it looks and feels like a native app, and you didn't have to visit an app store to get it.
