

Mrs Boscarino's Math Corner

What is Basic Skills Math?

The Basic Skills Math program at Knollwood School works to strengthen mathematical concepts in a small group setting. By working on foundational skills, problem solving, and basic facts, we will work together to build independence, confidence, and a LOVE for math!

How can you help at home?

- Check in with your child every night about what they did in math that day
- Math is everywhere! Talk about numbers with your child.
- Practice basic facts with your child as often as possible

Check out these AWESOME math websites!

Khan Academy	Video tutorials for students and parents on numerous math concepts.
Mr. Nussbaum	Games and interactive activities for all grade levels!
Tang Math	Skill and learning games to practice counting, place value, fact fluency and so much more.
National Library of Virtual Manipulatives	Virtual manipulatives to help with homework and other activities!
Mr Math Blog	Videos that can give assistance with daily lessons taught in the classroom.
