

Dear Parents and Students,

August 16, 2018

Students will need a graphing calculator in their math courses both for work in class and at home. We urge each of you to purchase your own calculator. We suggest a TI-84 PLUS. The cost is about \$110 and they are available at most discount stores. The TI-83 PLUS is also recommended. We *do not* recommend the purchase of a TI-86, TI-89, or TI-92 calculator.

If you do not purchase your own calculator, the mathematics department will check out a TI-84 to you for the year. You are responsible for providing the AAA batteries needed to operate the calculator.

Please complete the following and return it to your math teacher or Kayla Beyer (department lead). By signing below, you are agreeing to return the same working calculator by May 30, 2018. If it is not returned by that date, you will be charged \$110 for the replacement.

Kayla Beyer
Department Lead – Mathematics
